

# # CSI Case Report

## ## Executive Summary

(Error generating summary: 404 models/gemini-1.5-flash is not found for API version v1beta, or is not supported for generateContent. Call ListModels to see the list of available models and their supported methods.)

## ## Scene Description

one-bedroom apartment was discovered in a state of disarray late at night. The main door showed signs of forced entry, with broken glass scattered on the floor. An overturned chair was found near the dining table, and multiple blood stains were visible on the carpet leading toward the bedroom. Inside the bedroom, a blood-smeared knife was recovered near the bed. Muddy footprints were observed near the entrance and along the hallway, suggesting a possible escape route through the rear stairwell. No firearm evidence was found at the scene.

## ## Evidence Table

ID	Type	Location	Description	Confidence
----	------	----------	-------------	------------

---	---	---	---	---
-----	-----	-----	-----	-----

EV-b99cfad1-1   blood_stain   derived from scene text   Detected blood_stain based on description or image.   0.75
--

EV-b99cfad1-2   knife   derived from scene text   Detected knife based on description or image.   0.75
--

EV-b99cfad1-3   footprint   derived from scene text   Detected footprint based on description or image.   0.75
--

EV-b99cfad1-4   broken_glass   derived from scene text   Detected broken_glass based on description or image.   0.75
--

EV-b99cfad1-5   chair   derived from scene text   Detected chair based on description or image.   0.75
--

EV-b99cfad1-6   table   derived from scene text   Detected table based on description or image.   0.75
--

EV-b99cfad1-7   door   derived from scene text   Detected door based on description or image.   0.75
--

EV-b99cfad1-8   forensic_clue   contextual   forced entry or exit   0.85
--

| EV-b99cfad1-9 | forensic\_clue | contextual | footprints suggest movement or arrival path | 0.85 |

## ## Timeline

- Step 1: Suspect arrived at the scene - Evidence -- Movement or entry indicators detected
- Step 2: Weapon discharged or used - Evidence -- Ballistic or weapon evidence present
- Step 3: Victim sustained injuries - Evidence -- Blood evidence confirms impact
- Step 4: Suspect fled the scene - Evidence -- Footwear patterns indicate exit path

## ## Suspect Hypotheses

- SP-1433d2: age 25-40, build medium, confidence 0.45. Reason: Based on knife evidence, probable right-hand usage, medium build typical for single aggressor.
- SP-2a92df: age 18-28, build slim, confidence 0.28. Reason: Lighter build hypothesis due to limited physical disturbance at the scene.
